Biophilia Edward O Wilson

Wilson is a master storyteller, skillful at evoking exotic scenes.”—Washington Post Book World “A fine memoir by one of America’s foremost evolutionary biologists...erudite, elegant, and poetic. E. O. Wilson defines biophilia as ‘the innate tendency [in human beings] to focus on life and lifelike process. To an extent still undervalued in philosophy and religion, our existence depends on this propensity, our spirit is woven from it, hopes rise on its currents.’

with nature and other forms of life. Edward O. Wilson introduced and popularized the hypothesis in his book, *Biophilia* (1984). He defines biophilia as "the urge to affiliate with other forms of life".

Biophilia hypothesis - Wikipedia

"Biophilia" is the term coined by Edward O. Wilson to describe what he believes is humanity's innate affinity for the natural world. In his landmark book "*Biophilia*," he examined how our tendency to focus on life and lifelike processes might be a biologically based need, integral to our development as individuals and as a species.

Fromm and was later popularized by American biologist Edward O. Wilson. Biophilia hypothesis, idea that humans possess an innate tendency to seek connections with nature and other forms of life.

biophilia hypothesis | Description, Nature, & Human ...

In 1984, E.O. Wilson first used the term Biophilia to describe his belief that humans inherently enjoy the diversity of life on earth, and that much of our well being comes from that enjoyment. While a constructive view, it is also a physical fact that our survival as a species depends on preserving biodiversity.

- Edward O. Wilson, Biophilia To explore and affiliate with life is a deep and complicated process in mental development. To an extent still undervalued in philosophy and religion, our existence depends on this propensity, our spirit is woven from it hope rises on its currents. - Edward O. Wilson, Biophilia

Quotes - My Biophilia

Biophilia, by E.O. Wilson, is a brilliantly constructed novel exploring the human connection to the natural environment. The term biophilia, coined by Wilson, describes the human affinity for life, which according to Wilson, engenders both a human-to-human connection and a human connection to all other living species.
